

ASAD EISA

Front-End Developer | Vue.js · Nuxt.js · React · TypeScript · Tailwind CSS
5+ Years Building Web Applications | 3+ Years Professional Experience
Tartous, Syria | +963 997437142 | asad.eisa.dev@gmail.com | asadeisa.github.io |

PROFESSIONAL SUMMARY

Front-End Developer with 5+ years of hands-on experience building web applications and 3+ years of professional experience delivering production-ready solutions. Specialized in Vue 3, Nuxt 3, React, TypeScript, and modern frontend architecture across SaaS platforms, e-commerce systems, publishing platforms, and business dashboards. Experienced in performance optimization, SEO, REST API integration, state management, responsive design, and bilingual (Arabic/English) user experiences. Strong focus on clean code, maintainability, accessibility, and cross-browser compatibility. Comfortable working in remote teams and delivering features through modern AI-assisted development workflows.

CORE TECHNICAL SKILLS

Frameworks: Vue.js 3/2, Nuxt 3/4, React, Laravel, Composition API, Pinia, Vuex, Vue Router

Languages: TypeScript, JavaScript ES6+, Php, HTML5, CSS3

UI & Styling: Tailwind CSS, Bootstrap, SCSS, Nuxt UI, CSS Grid, Flexbox, mobile-first responsive design

API & Data: REST APIs, async data flows

State Mgmt: Pinia, Vuex

Performance: SSR, SSG, lazy loading, code splitting, bundle optimization, Lighthouse auditing

Tooling: Git, Vite, Webpack, Postman, Playwright mcp, Lighthouse, Figma

AI Workflow: Claude Code, OpenAI Codex, prompt engineering, agentic task decomposition, context files, reusable skills

PROFESSIONAL EXPERIENCE

Full-Stack Developer | CityArt

Jan 2026 – Jul 2026

Remote

- Delivered production frontend improvements across publishing, e-commerce, bilingual company websites, and research platforms using Vue 3, React, laravel, and TypeScript.
- Wefaq Magazine wefaqmagazine.com — Research publishing platform built with React + Supabase; implemented submission workflows, reviewer arbitration, content archive, and admin management with bilingual Arabic/English UI.
- Balsa Files balsa.tayasmart.com — E-commerce platform with cart, wishlist, checkout, payment status, and responsive user flows.
- Built and refined admin dashboard interfaces covering business metrics, user/permission management, invoices, newsletters, editorial boards, and calendar notes.
- Improved cross-browser compatibility and mobile responsiveness across children's education screens, login/signup, profile, cart, checkout, header, footer, and dashboard pages.
- Applied web security practices including input validation, secure form handling, and HTTPS-aware API integration across multiple client projects.
- Used Claude Code and OpenAI Codex daily for frontend task planning, code review, debugging, and structured agentic workflows with context files and reusable skills.

Frontend Developer | Albaz Globe

Jul 2025 – Dec 2025

Iraq, Remote

- Developed and maintained complex admin dashboards for technology services in the Iraqi market using Vue.js, Nuxt.js, and TypeScript.
- Integrated REST-driven dashboard views and visualization components for AI-driven application workflows.
- Managed global application state with Pinia, improving consistency across multi-step user flows.
- Translated Figma wireframes into reusable, accessible, responsive Vue 3 components; ensured cross-browser consistency across Chrome, Firefox, Safari, and Edge.

Frontend Developer, Contract | Parking & Creative Platforms

Jan 2025 – Jun 2025

Remote

- Park & Fetch parkandfetch.com — Modernized platform to Nuxt 3; achieved 100 SEO score on Google PageSpeed Insights through sitemap automation and Nuxt optimization.
- Reduced unused JavaScript and improved client-side payload quality through bundle review and code splitting.

- Hadiawada hadiawada.com — Artist portfolio platform built with Vue 3 + Vite; accessibility-focused, responsive, cross-browser compatible.

Lead Frontend Developer | Delivaz Multi-Vendor E-commerce

Dec 2023 – Dec 2024

Remote

- Led frontend development for a multi-vendor e-commerce platform using Nuxt 3 with scalable, SEO-friendly architecture.
- Improved Lighthouse performance scores from 70 to 95 through lazy loading, code splitting, and frontend optimization.
- Improved accessibility, cross-browser compatibility, and release quality in collaboration with cross-functional teams.

SELECTED PROJECTS

SpeakType github.com/asadeisa/SpeakType — **Open-source** SaaS browser extension (**MV3, in active development**) using Vue 3 + TypeScript + WXT that injects a mic icon into editable web fields and uses AI-powered STT for voice-to-text input. Backend: Nuxt 4, Neon PostgreSQL, Stripe.

Portfolio asadeisa.github.io — Professional portfolio built with Nuxt 3, showcasing modern frontend implementations.

EDUCATION

Engineering Degree in Information Technology — Tartous University, Syria | 2017 – 2022

LANGUAGES

Arabic: Native | English: Upper-Intermediate (B2)
